3.93 / 4.5 GPA (major 4.05)	**4** Contest & academic awards	**7** Leadership roles	**2026.08–** Current role

SUMMARY

I plan products and marketing and coordinate across teams, and I also build with AI myself. Starting from embedded systems and vehicle communication (C/C++, CAN) in university, I led three teams and won four awards. I aim to be a PM who doesn't stop at planning — I build it and check it myself.

EXPERIENCE

Allie Research Inc. Junior PM · AI/AX

Aug 2026 – Present

- Planning — product planning · marketing planning · cross-team coordination
- Development — messenger app development · AI model fine-tuning · internal system automation

Telechips Academy C/C++ · Low-level systems program

Feb 2026 – May 2026

- C/C++, system architecture, Linux kernel internals, device drivers, hardware porting
- Embedded OS solution and mini-game (Allegro); optimization through disassembly analysis
- Bootcamp class representative · ran a biweekly study (code review, low-level programming)

Techways Work-study · Test automation

Aug 2024 – Feb 2025

- Built equipment control, real-time graph and auto-sequence tools (C#, LabVIEW)
- Improved long-message reception in CAN/UDS diagnostics with flow control and queue logging
- Grand Prize, Work-study Essay Contest

Korea Alps R&D Center intern · Vehicle verification

Jan 2024 – Feb 2024

- Verified vehicle switch products in CAN/CAN FD (CANoe, CANalyzer, VT System)
- Analyzed signal behavior and verification criteria; issue tracking

High-frequency Antenna Design Lab Undergraduate researcher · Incheon National University

Sep 2022 – Dec 2023

- Joined a beekeeping IoT industry-academia project with RDA and Andong National University
- CST antenna design; 28 GHz measurements (VNA, spectrum analyzer)

PROJECTS

Villa Parking Management App Apr – Oct 2024 · Team leader

(4)

Reduced double-parking inconvenience with plate recognition and exit-time prediction. Wrote requirements, screen design and ERD; YOLOv8 + EasyOCR for vehicles and plates; Django web showing per-slot status and expected exit time. After the contest, rebuilt it alone in React with Gaussian-process prediction, Docker and GitHub Actions deployment.

🏆 **ACK 2024 Excellence Paper Award · Hanium ICT Mentoring Contest Selected**

Python · Django · React · YOLOv8 · EasyOCR · Docker

Safety Helmet with Communication May – Jul 2023 · Team of 4

Detects falls and harmful gas and alerts managers over LoRa. Designed the jig, soldered the sensor circuit, wrote Arduino firmware and a PyQt5 monitor (up to 6 workers at once).

🏆 **Industry-Academia Capstone Design — Silver**

Arduino · C/C++ · LoRa · PyQt5

Beekeeping IoT Sep 2022 – Dec 2023 · Industry-academia

Remote view of hive temperature, humidity, gas and weight with RDA and Andong National University. ESP32 firmware (ESP-NOW, deep sleep) and PHP·MySQL web; real-time monitoring of 3 hives.

ESP32 · PHP · MySQL · CST

Measurement & Diagnostics Automation Aug 2024 – Feb 2025 · Techways

Automated manual equipment handling and diagnostic checks (power → load → diagnosis → logging).

🏆 **Grand Prize, Work-study Essay Contest**

C# · LabVIEW · CAN/UDS

EDUCATION

B.Eng., Information & Telecommunication Engineering — Incheon National University — Mar 2019 – Feb 2025

GPA 3.93 / 4.5 · Major 4.05 / 4.5

AWARDS

Grand Prize, Work-study Essay Contest — Feb 2025

Incheon National University

Excellence Paper Award, ACK 2024 — Smart Parking System for Villas with Small Parking Spaces — Nov 2024

KIPS ICT Mentoring Conference

Hanium ICT Mentoring Contest — Selected — Dec 2024

KAIT

Industry-Academia Capstone Design Silver — Safety Helmet with Communication — Jul 2023

Incheon National University

LICENSES & SERVICE

Engineer Information Processing — Jul 2025
HRD Korea

TOEIC Speaking IM3 — Sep 2024

Class 1 Driver's License — Aug 2022

Army, honorable discharge (Sergeant · squad leader) — Feb 2020 – Aug 2021

TRAINING & ACTIVITIES

Automotive CAN/CAN-FD · Ethernet training — Jun 2024
Sungkyunkwan Univ. Future Automotive Program

Digital 3D printing · Entrepreneurship training — 2023
Incheon National University

Programming club NULL — 2023 president, C/C++ mentoring — 2019 – 2024

University futsal club Chaba — president — 2023 – 2024

SKILLS

Comfortable	TypeScript · Python
Working knowledge	C/C++ · C# · React · Django · MySQL · Docker
Have used	LabVIEW · Arduino · PyQt · PHP · AWS EC2
